

VMS 07

9 mm sub-machine gun

The VMS 07 sub-machine gun is a modern automatic hand-held gun with a fixed barrel and a partly locked breech system. The machine gun can be easily operated by both the left-handed and right-handed, as well as spent case ejection to the right or left can be selected due to its design. The cocking lever of the weapon is located in the area above the barrel.

The design is stationary, i.e. it is in the front position during the firing and it does not move together with the breech bolt. Sights are fitted on the upper part of the upper breech bolt housing on a MIL-STD-1913 rail and they also provide aiming when accessories are installed. The upper breech bolt housing, trigger and

striking mechanism lower housing, front stock, as well as other plastic components are made of high strength polymer. The VMS 07 offers comfort and accuracy with its concept of firing with a partly locked breech bolt in the front position. The VMS 07 can be easily dismantled into main components groups for the purpose of maintenance and cleaning without using any tools.

FUNCTION:

Automatic function repetition is provided by gas pressure on a cartridge bottom.
The VMS 07 provides mode of fire selection:

- single shot
- 2-round burst
- fully automatic

VMS 07 CONSISTS OF:

Upper breech bolt housing with barrel and accessories

Breech bolt mechanism with bolt return spring

Lower housing with trigger and striking mechanism, magazine shaft and an extension butt

Magazine

ACCESSORIES:

Collimator

Flashlight

TECHNICAL DATA:

Calibre	9 mm Luger (9x19)
Weight without magazine	1800 g
Overall length	454/722 mm
Height without magazine	198 mm
Width through cocking lever	55 mm
Barrel length	193 mm
Line of sight length	300 mm
Barrel rifling type	grooves
Number of grooves in the barrel	6
Controls	ambidextrous
Magazine	30 cartridges
Finish polymer frame	Matte – black
Finish metal slide	Matte - black
